- The 2006 column was redone for two different reasons ...
  - I “grandfathered” in the 3 bonus points for participation in the Open Division ... I did not go back to 2005 and earlier to do the same calculation because those numbers from those years are no longer relevant.
  - I made an error in the calculations for last season ... somehow I lost track that the CCS had changed 7 wins from a “B” to an “A” ... and therefore made those calculations as if 7 wins were “B” status teams ... this error made quite a few LCI’s inaccurate (too low). I was very fearful that my error might have had serious ramifications because several leagues just missed the next higher classification by several tenths or hundredths of a point ... therefore having an effect on who made it into the tournament and of course seeding. I got lucky ... after doing the recalculations correctly, no league’s LCI would have changed ... so despite that fact that there were small fluctuations upward of team’s numbers, each league’s A, B or C status remained the same.

Coaches may look at the 2006 column and see that their LCI is different than the chart previously published ... they can also do some simple math and see that their leagues LCI might have risen a level based on the “new” numbers ... this variance is due to the “grandfathering” in of the new open division bonus points ... not my error in calculation.

- The 2007 column is calculated correctly and includes the new open division bonus points.
